

Eduardo Yañez Mejía

ENGINEER, GRAPHIC DESIGNER, WEB DEVELOPER

About me

I'm a JavaScript full-stack developer, passionate about graphic and UI/UX design, aiming to build beautiful interfaces. With hard work and consistency, I've become a web developer by myself, it taught me the importance of discipline, daily learning and a growth mindset to achieve mid and long term goals.

In my four years as a technical manager, I've learnt soft skills like assertive communication, empathy, team leading, and problem facing.

I've created beautiful designs in the last couple of years, considering user experience, and adapting myself to the continuous evolution of design trendings.

Education

> 2012 - 2017: Autonomous Mexico State University:

Engineering in Sustainable Energy Systems, Major in Solar Thermal Energy. Professional Certificate: **11544606**.

Courses and Certificates

> Microsoft LaunchX training, February to April 2022:

+160-hour full-stack bootcamp using JavaScript, NodeJS, ExpressJS, VueJS, testing, CI/CD. Completion Certificate.

> JavaScript ES9, HTML5, CSS3, and NodeJS from scratch / Nicolás Schurmann

20-hour course. HTML layout, design basics, logical thinking, algorithms and data structures.

> React ultimate guide / Nicolás Schurmann

20-hour course. Includes Hooks, React Router, Context, Redux, React Testing Library.

Experience

> Dec 2021 - today: Software Developer - In Situ Energía

- Design, implementation, maintenance of In Situ Energía website, quotation, technical proposals and calculation tools.

> Mar 2018 - today: Technical Manager - In Situ Energía

- Project Management, technical support, planning and implementation of engineering solutions.
- Government projects advisory and personal training.
- Branding desing, marketing campaigns, community management.

> Oct 2019- Nov 2021: Mentor - Mexico City Goverment

- Personaltraining to acquire skills for employability related to solar water heating.

Extra activities

> May 2022: Volunteer Mentor - Flattworld (co-founder)

- Flattworld aims to create a Latin community of software developers to help each other, share the love for coding and get better opportunities.

Skills

> Front-end:

JavaScript, React, Vue, HTML5, CSS3.

> Back-end:

NodeJS, ExpressJS, PostgreSQL, MongoDB.

> Tools & Methods:

Git, GitHub, Industry Standard Gitflow, TDD, React Testing, Jest Testing, Responsive Design, UX/UI, Figma, Adobe Illustrator, Adobe Photoshop, Postman, AutoCAD, SketchUp, SolidWorks.

> Professional:

Accelerated Learning, Remote Pair-Programming, Team Leading, Teamwork, Mentoring, SCRUM.

Projects

< In Situ Energía / >

Designed this website using Figma, Photoshop and Illustrator from scratch.

Technologies used: JavaScript, ReactJS, Redux, TailwindCSS, NodeJS, ExpressJS, ViteJS, REST, testing, MongoDB.

Site: www.in-situ.com.mx

< Shopping Cart / >

Designed this website using Figma, Photoshop and Illustrator from scratch.

Technologies used: JavaScript, ReactJS, NodeJS, Webpack.

Repo: github.com/eduym17/EY-shopping-cart

< Pokedex / >

Website to consume API and render conditional modal windows.

Technologies used: JavaScript.

Repo: github.com/eduym17/LX-FE-practice-pokedex
